Weather Key Points

Regional Operations Center

Western Region

Wednesday, June 29

- After the recent stretch of hot temperatures, a gradual cooling trend is expected through late week and into the holiday weekend
 - Minor to locally moderate heat risk impacts will still be seen across the southern deserts as daytime highs remain in the 100 to 110°F range, which is typical for late June and early July
- Fire weather conditions will remain locally elevated across many mountain, foothill, and desert locations of Inland and Southern Regions through the weekend due to breezy conditions each afternoon and ongoing dry conditions
 - Widespread critical fire weather conditions are not expected
- Dry weather is also expected for most of the state through the 4th of July weekend, though a few showers and thunderstorms are possible across far northern California Saturday through Monday
 - A few isolated showers and thunderstorms also can't be ruled out across far southeastern California (close to the Arizona border) on Wednesday, though most areas will not see any rainfall

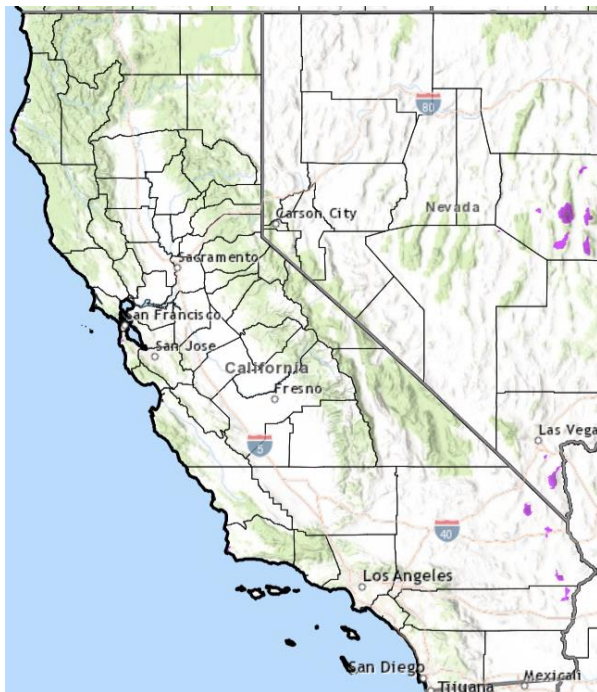

Precipitation Forecast
